Re: Reddon Residence
1207 Appleford Lane, Burlington Ontario

Dear Tom,

This letter is being written after the completion of a substantial main floor renovation to our home in Burlington, Ontario. It should be noted that this is the second renovation that TJC Construction Management Inc. ("TJC") has delivered to us at this location and both projects have exceeded our expectations.

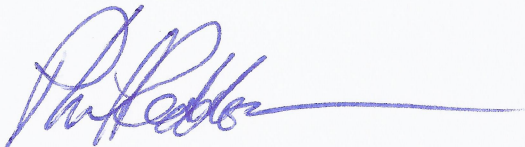

TJC is well organised and delivered a seamless interaction with a designer, cabinet maker, as well as structural steel fabricators and a myriad of additional sub trades that converged to provide a complete main floor renovation for our residence.

We received detailed plans, an itemized firm price quote, as well as a starting construction schedule from which both the home owner and TJC were able to obtain up to date timing and status of the project. TJC obtained and posted on site all building and work permits.

The project lasted over 3 months and the TJC crew as well as all sub trades maintained a safe and orderly work site including a job board and First Aid station. Each night the crew cleaned the site and left the residence in a orderly state given the significant scope of the project.

Based on the all of these factors and the quality of the work completed, we would recommend TJC to anyone considering them for a renovation project.

Regards,

Phil Reddon

Susan Reddon
